

Bedtime Math gives kids a new and wacky math story to solve every day. Work through the story and fill in a star--only one a day.

When you've filled all the stars, come to the library for a token to use in the Math Stories vending machine!

Find your fun daily math story on the website ([bedtimemath.org](http://bedtimemath.org)), on the free app (Bedtime Math), or check out one of Bedtime Math books from the library.

No logins! No drilling! It takes only 5 minutes a day!

## How It Works

[www.bedtimemath.org](http://www.bedtimemath.org)

**Back**

Every night, serve up a quick bite of wacky math--just for fun. No logins. No drilling. No scores.

Whether it's flamingos, ninjas or pillow forts, kids can see the math in their favorite topics. It begins with a short set-up story, followed by three levels of challenge for kids ages 3-9.

Parents can sign up for the nightly email, download the free app in English or Spanish, or read one from a library book. It takes 5 minutes a day, and it's not just for bedtime--any time of day can work!

Once you and your child have talked through the story, color a star in on the bookmark--just one a day. Bring the bookmark into the library and exchange it for a token to the Math Stories vending machine!
